# Anti-Fatigue Mat

ergoCentric®

# Anti-fatigue mat; reduce fatigue throughout the workday.

The ergoCentric anti-fatigue mat reduces strain that is caused by standing for long periods on hard surfaces. Designed with a soft upper layer and firm bottom layer, the anti-fatigue mat provides support for the entire foot (no wobbling or sinking). The enhanced cushioning and stability allow the user to feel comfortable as they shift their weight evenly along the mat reducing stress placed on their feet, legs and back.

## About the anti-fatigue mat

### Grip, slip and trip resistant design

High grip when used on carpeted floors but still easily movable with your foot, eliminating the need to bend down when moving the mat. Rubberized, non-slip gel foam top and bottom layer provides stability when standing for long periods while the beveled edges prevent any tripping hazards

### Cleanable and safe

One piece structure that is waterproof and easy to clean using water with a mild detergent and allow to dry completely. Enhanced with anti-bacterial properties making the mat hygienic and safe from unwanted bacterial growth. Made with non-toxic and latex-free (no PVC or BPAs) materials.

### Transportable

Includes a convenient handle making it easy to carry your mat from one location to another.
