Privacy Panels

Non-framed and Framed Privacy Panels are surface mounted panels for fixed height and height adjustable work stations. Privacy Panels are visually appealing and sturdy. Multiple panel materials are available and offer benefits such as improved acoustics, aesthetics, and physical and visual separation, as well as functional capabilities (tac board, white board, magnet board). Various heights and widths options accommodate a wide variety of table sizes.

Modesty Panels and Modesty+Privacy Panels

Modesty Panels and Modesty+Privacy Panels are front mounted panels for fixed height and height adjustable work stations. They provide visual privacy and are aesthetically pleasing. High Pressure Laminates are stylish and easy to clean and disinfect, and can perfectly match tabletop finish. Decorative Acoustic Panels are sturdy and tackable, effectively reducing the noise level. Various heights and widths options accommodate a wide variety of table sizes.

Dividers

Divider Panels are privacy panels designed to be used as an optional addition for seamless integration with the Power Data Rail system. They are installed using Direct Mount shell clamps and #6 flat head self-drilling screws for a secure and stable fit. With a Noise Reduction Coefficient of 0.45 and a Class A fire rating, these panels help enhance acoustic comfort while meeting stringent safety standards. Suitable for a wide range of table configurations, Divider Panels are available exclusively in non-framed acoustic or acrylic options and are compatible only with Direct Mount installations.

End Panels

The End Panel is a functional and aesthetic upgrade to high-performance upCentric desks, designed to enhance privacy and support practical separation in open-plan environments. Installed at the outer side of a desk, it helps define individual workstations or divide shared desking areas, improving visual organization and personal privacy.

Seamlessly integrated with upCentric height-adjustable desks, the panel maintains a clean, modern look while contributing to a more professional and structured workspace. It's simple installation makes it a versatile solution for evolving layouts and privacy requirements, without compromising style or functionality.
