

upCentric® Power Bars

Power bar with 10' spiral cord

Power bar with 10' straight cord

upCentric Power Bars feature a space-saving design with 3-sided 9 wide-spaced AC outlets, so more devices can be charged without blocking. The 45° angle plug easily fits behind furniture or in tight corners, further maximizing space utilization. Overload protection with automatic shutoff, preventing damage to equipment and devices.

The spiral cord power bar - the coiled design allows the cord to stretch out to reach a desired length. Spiral cords can be easily coiled up for storage or when not in use.

The straight cord power bar is simpler and easier to manage. The straight cord can lie flat against the wall or floor, reducing tripping hazards.
