

ergoCentric®

Leaders in ergonomic solutions
for the workplace

94% of ergonomists surveyed recommend ergoCentric's seating systems

Source: Manufacturer's survey, conducted during ACE 2016 Conference.

About us

Increasing health and productivity with adjustable task seating since 1990.

The human body was not made for sitting. Lack of proper support while seated adds stress to the body, which over a period of time, can lead to muscle fatigue, circulatory problems and even spinal injuries. Proper ergonomic seating provides the support essential to your health and the comfort you need to be productive.

At ergoCentric, our sole mission is to design and manufacture the best ergonomic chairs in the world and we are recognized as North America's premier manufacturer of high-quality ergonomic seating for office, specialty and healthcare environments.

tCentric Hybrid™

The look of ergonomic seating is changing.

The tCentric Hybrid is the first fully ergonomic mesh-back task chair.

Unlike other mesh chairs, the entire backrest of the tCentric Hybrid—not just the lumbar pad—adjusts vertically. This ensures the lumbar pad remains in proper alignment with the contour of the backrest frame, resulting in the best lumbar support of any mesh chair. With five inches of infinite back height adjustment, the backrest fits virtually everyone.

Incorporating the latest high-tech elastomeric mesh, the tCentric Hybrid's backrest is tensioned for optimal support. You will feel the difference.

Multiple mechanisms and options such as a lumbar pad, air lumbar, adjustable headrest and swivel arms allow the tCentric Hybrid to be configured from a simple boardroom chair to a fully loaded ergonomic chair. That is why we call it the tCentric *Hybrid*.

airCentric™ 2

Be cool. Be comfortable. Be productive.

The airCentric 2 combines innovative airflow engineering, 30 years of proven ergonomic design, patented technologies and new materials to keep you cool and comfortable.

Inspired by the breathability of mesh task chairs, the airCentric 2 combines the airflow inherent in mesh seating with the proven ergonomics of ergoCentric's foam and fabric seating for a truly comfortable seating experience.

HÅG Capisco™

Ride in comfort and style.

HÅG Capisco—*"The saddle seat chair"*—responds intuitively to the body's natural movements and provides unlimited possibilities for variation of the seated posture.

The unique shape of the backrest provides perfect support in numerous sitting positions and is made for greater freedom of movement, variation and natural sitting positions. The saddle seat can be adjusted between low and high working positions, all the way up to standing, enabling you to be more dynamic in your movements. It's perfect to pair with a height adjustable desk.

ergoCentric is the exclusive distributor of HÅG products in Canada.

upCentric® electric height adjustable tables

Sturdy design. Easy to assemble.

The benefits of varying between seated and standing postures throughout the workday are proven, and the upCentric electric height adjustable table is the high-quality, reliable choice.

Seamlessly adjust between sitting and standing with the easy-to-use up/down control with four position memory. The durable upCentric frame accommodates a variety of tabletop widths making retrofitting existing table tops an economical option. The open frame minimalist aesthetic complements all workspaces.

upCentric® monitor arms

Full adjustability is essential for productive and healthy workspaces.

ergoCentric's fully adjustable upCentric monitor arms are designed for the modern office, enabling you to comfortably position your monitors horizontally and vertically to suit your needs.

Whether you are sitting or standing, upCentric monitor arms instantly enhance any workstation, improving overall workspace ergonomics.
