Tiltable desktop provides optimal angles

Edge stopper ensures a secure work surface

Foot-activated effortless height adjustment

Locking casters enhance stability and safety

The upCentric® Mobile Workstation is a compact, ergonomic solution designed for today's dynamic work environments. Effortlessly adjust the height of the work surface with a convenient foot pedal to support your tasks, improve posture, and reduce fatigue. The tiltable desktop offers four angle options, ideal for activities such as typing, drawing, or reviewing documents, and includes an edge stopper to keep materials secure.

With its single-leg design and rolling casters, the workstation is highly portable, allowing effortless movement between offices, classrooms, healthcare facilities, or even your home. Front lockable casters ensure the workstation stays secure when stationary. Its lightweight design and easy assembly make it ideal for professionals, educators, and remote workers who need a flexible and adaptable workstation.
